## Data source and methods

### Incidence

**Country-specific data source:** No data  
**Method:** No data: the rates are those of neighbouring countries or registries in the same area

[Click here to see detailed data source and methods](#)

### Mortality

**Country-specific data source:** Survival estimates  
**Method:** Estimated from national incidence estimates by modelling, using mortality:incidence ratios derived from survival estimation

[Click here to see detailed data source and methods](#)

### Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2011-2020), and scaled using Human Development Index (HDI) ratios.

\* includes non-melanoma skin cancer (NMSC)

\*\* NMSC included in other cancers

Age standardization using world population ([see link](#))
