Data source and methods

Incidence

Country-specific data source: No data
 Method: No data: the rates are those of neighbouring countries or registries in the same area

Mortality

Country-specific data source: No data
 Method: Estimated from national incidence estimates by modelling, using mortality:incidence ratios derived from survival estimation

Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2011-2020), and scaled using Human Development Index (HDI) ratios.

* includes non-melanoma skin cancer (NMSC)
 ** NMSC included in other cancers
 Age standardization using world population (see link)
