Data source and methods

**Incidence**
Method: Weighted simple average of the most recent subnational rates applied to 2022 population.

**Mortality**
Country-specific data source: No data
Method: Estimated from national mortality estimates by modeling, using mortality/incidence ratios derived from survival estimation.

**Prevalence**
Compcalc data uses site- and age-specific incidence to 2013-15 and 5-year prevalence ratios from Nordic countries and EuroHarm for the period (2011-2015) and scaled using Human Development Index (HDI) ratios.
